April 14, 2021

DURHAM, N.C., April 14, 2021 (GLOBE NEWSWIRE) -- Humacyte, Inc., a clinical-stage biotechnology platform company developing universally implantable bioengineered human tissue at commercial scale, today announced the closing of a secured debt financing facility with Silicon Valley Bank for up to \$50 million, of which the first \$20 million was funded at closing.

"This financing further strengthens Humacyte's financial and operational flexibility as we advance the broad development of our pipeline, prepare for near-term Phase 3 data readouts of our potential first-in-class Human Acellular Vessels (HAVs) in arteriovenous vascular access and vascular trauma, and prepare to become a publicly traded company," said Laura Niklason, M.D., Ph.D., Chief Executive Officer of Humacyte. "We are grateful for the support from SVB, who share our vision for the potential of Humacyte's universally implantable regenerative human tissue to transform the way we care for patients."

On February 17, 2021, Alpha Healthcare Acquisition Corp. (Nasdaq: AHAC), a special purpose acquisition company, and Humacyte announced the execution of a definitive business combination agreement along with a fully committed \$175 million PIPE financing agreement.

The debt facility will mature on March 1, 2025, with up to three total years of interest-only payments.

"We're proud to support Humacyte and the development of their Human Acellular Vessels, a treatment which has the potential to bring life-changing solutions for patients affected by vascular degeneration," said Scott McCarty, Director of Life Sciences and Healthcare at Silicon Valley Bank. "We look forward to continuing our relationship with Humacyte as they scale and grow."
